CPT C. James Scanlon, AMSC
Assistant Chief, Physical Therapy Section
United States Army Hospital
Fort Carson, Colorado 80913

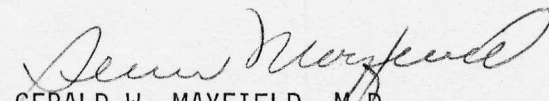

Dear Jim:

Sorry I haven't gotten back to you sooner on a followup on the presentation of the above-knee socket paper that was given in February at the Academy Meeting. The paper was well received; however, there weren't as many people there due to the late afternoon presentation time as I would have hoped. I am inclosing a copy of the short publication in the ORTHOPAEDIC TRANSACTIONS, May 1977, a copy of which I just received in the last several days. This particular publication does not preclude publication in a more complete form in another journal. I would still like to submit it in a more complete form to the Journal of Bone and Joint Surgery.

I will be in Denver some time between Tuesday, 30 August 1977 and Saturday, 3 September 1977. I would like to sit down and talk with both you and Ivan concerning further developments with the method, particularly your work that you have been able to do more on the energy consumption in the AK amputees wearing the different types of sockets. Will you be in Colorado Springs during that period of time and if so, can you please drop me your telephone number and address, if it has changed? I will give you a call when I arrive in the area. I have also sent a letter to Mr. Long at this time.

I am looking forward to seeing you in the near future.

Sincerely,

GERALD W. MAYFIELD, M.D.
Colonel, MC
Assistant Chief, Orthopaedic Service
